

Design proposal

Best Top designs for website around the world that I found find inspiring:

https://www.thebestdesigns.com/themes/2015/rock-group-infographic (can also check on design.html for design screenshot)
https://www.thebestdesigns.com/themes/2015/rosetta-multi-purpose (can also check on design.html for design screenshot)
https://www.thebestdesigns.com/designs/jonathan-patterson (can also check on design.html for design screenshot)
https://www.thebestdesigns.com/designs/neverbounce (can also check on design.html for design screenshot)

All the page will contain follow module

Top NAV module
Side Module (side NAV) + (can turn into drop down menu from top NAV)
Image module
Text module
Video module

Color Them

Multi colors for top NAV
Blue color for side module
No color for module
Black text with white background

Design idea

The contents and images and information from <http://floridaenergy.ufl.edu/> are a lot to display in one page. Therefore, the page should lead and present information in the way that easy to navigate without confusing users as well as able to avoid information overload. The propose idea to design for FESC page is simple but enough information.

Top NAV for homepage – should be blocks with specific links to separate pages.
Image module – size (400x400 pix) and locate either left or right of the page.
Image module – can be stack up for mobile view.
Image module – can be smaller to fit into mobile screen.
Text module – for desktop view is 24px in size.
Text module – for mobile view is smaller, depend on screen size.
Image and text together for desktop view – text on the left and Image on the right.
Image and text together for mobile view – text on top and image on the bottom.

Image/chart and text together for desktop view – title on top, description below title, text on the left, image/chart on the right.

Image and text together for mobile view – title on top, description below, image below description and text.
